CS210. Algorithms and Data Structures (Mandatory)

2022-II

1. General information

1.1 School	:	Sistemas de Información
1.2 Course	:	CS210. Algorithms and Data Structures
1.3 Semester	:	4 ^{to} Semestre.
1.4 Prerequisites	:	CS113. Computer Science II. (3 rd Sem)
1.5 Type of course	:	Mandatory
1.6 Learning modality	:	Face to face
1.7 Horas	:	2 HT; 2 HP; 2 HL;
1.8 Credits	:	4

2. Professors

3. Course foundation

The theoretical foundation of all branches of computing rests on algorithms and data structures, this course will provide participants with an introduction to these topics, thus forming a basis that will serve for the following courses in the career.

4. Summary

1. Graphs 2. Scatter Matrices 3. Balanced Trees

5. Generales Goals

- Make the student understand the importance of algorithms for solving problems.
- Introduce the student to the field of application of data structures.

6. Contribution to Outcomes

This discipline contributes to the achievement of the following outcomes:

- 1) Analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions. (**Usage**)
- 2) Design, implement and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline. (**Usage**)
- 6) Apply computer science theory and software development fundamentals to produce computing-based solutions. (**Usage**)

7. Content

UNIT 1: Graphs (12)	
Competences:	
Content	Generales Goals
<ul style="list-style-type: none"> • Graph Concept • Directed Graphs and Non-directed Graphs. • Using Graphs. • Measurement of efficiency ,in time and space. • Adjacency matrices. • Tag adjacent matrices. • Adjacency Lists. • Implementation of graphs using adjacency matrices. • Graph Implementation using adjacency lists • Insertion, search and deletion of nodes and edges. • Graph search algorithms. 	<ul style="list-style-type: none"> • Acquire Dexterity to Perform Correct Implementation. [Usage] • Develop knowledge to decide when it is better to use one implementation technique than another. [Usage]
Readings: Cormen et al. (2009), Fager et al. (2014), Knuth (1997), Knuth (1998)	

UNIT 2: Scatter Matrices (8)	
Competences:	
Content	Generales Goals
<ul style="list-style-type: none"> • Initial concepts. • Dense Matrices • Measurement of Efficiency in Time and Space • Static scatter vs. dynamic matrix creation. • Insert, search, and delete methods. 	<ul style="list-style-type: none"> • Understand the use and implementation of scatter matrices.[Assessment]
Readings: Cormen et al. (2009), Fager et al. (2014), Knuth (1997), Knuth (1998)	

UNIT 3: Balanced Trees (16)	
Competences:	
Content	Generales Goals
<ul style="list-style-type: none"> • AVL Trees. • Measurement of Efficiency. • Simple and Composite Rotations • Insertion, deletion and search. • Trees B , B+ B* y Patricia. 	<ul style="list-style-type: none"> • Understand the basic functions of these complex structures in order to acquire the capacity for their implementation. [Assessment]
Readings: Cormen et al. (2009), Fager et al. (2014), Knuth (1997), Knuth (1998)	

8. Methodology

El profesor del curso presentará clases teóricas de los temas señalados en el programa propiciando la intervención de los alumnos.

El profesor del curso presentará demostraciones para fundamentar clases teóricas.

El profesor y los alumnos realizarán prácticas

Los alumnos deberán asistir a clase habiendo leído lo que el profesor va a presentar. De esta manera se facilitará la comprensión y los estudiantes estarán en mejores condiciones de hacer consultas en clase.

9. Assessment

Continuous Assessment 1 : 20 %

Partial Exam : 30 %

Continuous Assessment 2 : 20 %

Final exam : 30 %
